## NUMERACY

Tartan is a picture made by horizontal and vertical-coloured lines crossing over each other.

The lines are repeated over and over to make a pattern. Patterns can be made from lots of different things, colours, numbers, shapes, or anything at all! Maybe you could try making a pattern at home using things inside your house, or from outside when you go out for a walk, such as sticks, stones, leaves.

Here you can hear a song all about patterns-
